## INTRODUCTION

---

HEREWITH I present to the Devon Cattle breeders of America, Vol. III, of the AMERICAN DEVON RECORD. In doing so I have a few words to say by way of preface and they are these :

I have used great care and spared no expense to have Vol. III as free from defect as possible, but spite of my watchfulness and labors in this behalf, I have no doubt some few errors will be noted by the reader. Until one has actual experience in editing a herd book, he can have no adequate idea of the difficulty and labor involved, nor of the amount of watching that is required to keep out mistakes and bar the door against unworthy animals.

I speak of this not to palliate in advance any errors that may have crept into this volume notwithstanding my vigilance, but to show reason for the inflexibility of rules, as well as my strictness in the application and enforcement of them, which may have seemed to some of my patrons, in certain cases, unreasonable. I beg to assure such that it was only that my work might have that highest and best claim to the approval of the Devon breeding public, namely, *reliability*, that I was and am so strict. When it is known that this inflexibility on my part in enforcing the rules of entry and transfer not only added greatly to the labor and expense of conducting this business, but actually *lessened its income*, it will be seen that in my conduct towards some who may have thought themselves dealt hardly with, I was certainly not actuated by any selfish or unmanly motive.

On the 26th of March of this year (1884) upon the oft repeated suggestion of several prominent Devon men, a number of breeders assembled in the parlors of the East End Hotel, in the City of Pittsburgh, and organized the American Devon Cattle Club. A constitution was adopted, an executive committee chosen, and officers elected.

At this writing the Secretary is receiving the names of breeders who have accepted the invitation to become charter members. It is the expectation that the Club will take charge of the American Devon Record shortly after the present volume has been published.

The 4th and all succeeding volumes will therefore be edited and published under the auspices of the Club. As this then will be the last issue I shall edit, I take the opportunity of thanking my patrons and the Devon interest generally for their uniform courtesy and forbearance during my incumbency of the editorial chair and to bespeak for the new management the same patronage and kindly assistance in tracing out partially forgotten pedigrees &c., as was extended to me. In bidding farewell, I would urge upon members of the Club and other patrons, the duty of making an effort in behalf of the Record in the way of influencing breeders to promptly enter their herds, and as they grow, to enter the increase, to see to it that when a sale is made a *transfer* is procured, as well as to assist the enterprize by purchasing its publications as they are issued. This is the way to put the work fairly upon its feet and to make it self-supporting.

Applications for entry in Volume IV and transfer should be addressed to me until further notice.

Very Respectfully,

J. BUCKINGHAM, *Editor*.

## Sketches of Devon Breeders.

---

It was my intention to print in Volume II. short sketches of the lives and experiences of some of the older Devon men of America, and accordingly I wrote the survivors so far as I could find them, or their successors, requesting such facts as were needed as ground-work for the sketches. A few only responded in season, and I was compelled to abandon the project so far as Vol. II was concerned.

I have however, preserved the information obtained, and have arranged it for the present Volume. In many as the reader will notice, I give few or no facts as to the personal history of the parties, the information furnished me being in most cases, very meagre.

I have arranged the sketches alphabetically as to the subjects.

EDITOR.

---

LEWIS F. ALLEN was born in Westfield, Mass., January 1, 1800. He began to breed Devons at his farm on Grand Island in the Niagara River, near Buffalo, N. Y. in the fall of the year, 1833.

He made his first purchase from Caleb N. Bement, of Albany, obtaining from him the bull King 765. About the same time he purchased two young cows from the late Hon. Jas. G. King, a banker of New York City. All these were descendants of Devons bred by the celebrated Mr. Coke, of Holkham, England, (afterward Earl of Leicester) and imported by Hon. Rufus King in the year 1819.

In 1837 Mr. Allen obtained from Mr. George Patterson, of Maryland, the well known importer and breeder, two beautiful yearling heifers and an aged cow. These constituted the basis of Mr. Allen's fine herd, the descendants of which are held in high esteem all over the United States. Mr. Allen's Devons were first prize winners in a great number of exhibitions, both State and County and although he never made *tests* of milk and butter qualities, his Devons stood *high* as dairy animals. Mr. Allen continued to raise and sell Devons until about the year 1874, when having been reducing his herd for some years, he sold what remained to a cattle breeder in Missouri, and retired from that branch of business. Mr. Allen however, still retained his faith in the superiority of the breed and only gave up breeding them because of the then lack of appreciation on the part of cattle men generally.

He writes me from Buffalo, N. Y., where he now resides: "I bred Devons for about forty years, side by side with Shorthorns, each in their purity of blood, and in their grades with common cows, both steers and heifers to my entire satisfaction. \* \* \* \* \* The Devons were as a rule excellent milkers."

Mr. Allen from the year 1845 to 1883 was the Editor and publisher of the then twenty-four volumes of the American Short Horn Herd Book.

---

SAMUEL BAKER, the father of Truman Baker, whose name has long been so familiar to Devon men, was born near Troy, N. Y., in the year 1793. His first venture in Devons was about the year 1830, at New Lisbon, N. Y.

He obtained some heifers from George Tuckerman a breeder living in the same county, also a bull from the

same neighborhood, but as no herd books existed at that day, it is impossible to give a further clue to these animals.

Mr. Baker continued in the business for a few years, when he sold his farm and stock. He next appears as a breeder in partnership with his son, the above mentioned, TRUMAN BAKER, who was born March 17, 1820, at New Lisbon, N. Y. About the year 1847, this gentleman began to breed Devons in partnership with his father, under the firm name of S. Baker & Son. They made their first purchase of Samuel Gilbert, of Gilbertsville, N. Y., who had them from Jno. Cowlin, of Truxton, N. Y., by whom their ancestors were imported. Among those obtained from Mr. Gilbert was the cow Dolly 1002, a descendant of Cowlin's imported Dolly 111½. Their first bull was descended from the Patterson importation, through the herd of H. N. Washbon, Morris, N. Y. They also procured a bull of the Cowlin stock about the same time. These Devons, the names of which have been lost in the lapse of time, were the starters of the Baker herd. Like all good breeders they bought and sold from time to time, adding new blood and making encouraging progress in the development of the valuable qualities of the breed.

The senior member of the firm died in 1866, from which time the business has been conducted by Mr. Truman Baker alone, under whose careful management it has continued to grow in favor. Mr. Baker has bred largely for the yoke and reports it profitable; he has not however neglected the butter qualities, several of his cows showing most excellent results when tested in this regard.

Mr. Baker is the winner of many prizes, often against

a large number of competitors exhibiting animals it is an *honor indeed* to beat.

---

E. P. BECK. From the very meagre information I have been able to obtain, concerning this notable breeder of Devons, I collate the following facts:—

Mr. Beck was a native of Dumfries, Scotland, and was born in the year 1800. He emigrated to the U. S. and in the year 1837 he began the business of Devon breeding at Sheldon, N. Y. He obtained his first stock from William Garbut, of Wheatland, N. Y. Messrs. Beck & Garbut seem to have bred on shares, using Garbut's cow Devon 979 from about the year named to 1842. Out of this cow Mr. Beck obtained Lily 1806, Crescent 880, Victoria (young) 2652, and Betty 683, and these with some others constituted the basis of his herd.

The transactions of the New York State Agricultural Society for the years 1842, 1848, 1849, 1850 and 1851, show that Mr. Beck received a large share of the prizes for Devons, competing with such breeders as Van Rensselaer, Blakeslee, Washbon and L. F. Allen. Mr. Beck's name is a familiar one in the old Herd Books, and to his herd trace some of the best Devons on the continent to-day.

---

JAMES A. BILL. This distinguished Devon breeder was born in Lyme, Ct., (the town in which he still resides) March 20, 1817. Mr. Bill has for many years been the leading spirit in the Connecticut State Agricultural Society, and is still its President. To his energy and executive ability the State is largely indebted for its successful Agricultural fairs.

Mr. B. began to breed Devons in the year 1845, ma-

king his first purchases from the justly celebrated herd of S. & L. Hurlbut.

At that early day in the history of Devon breeding in America, we had no Herd Books, and so I am unable to give the names of Mr. Bill's first animals. It however suffices any intelligent Devon breeder to know that his herd is based on Hurlbut stock.

Mr. Bill entered the business with genuine Yankee energy, and has in the 39 years he has devoted to it, built up a reputation of which not only his town and county but his State and the Devon interest all over America may well be proud.

He has for many years been a most successful competitor at the various fairs and cattle shows of his neighborhood and State. From 1851 when he carried away the lion's share of the prizes awarded at the Connecticut State Fair, down to the present time he has had a career of uninterrupted brilliancy as an exhibitor of pure bred Devons in State as well as in County and local fairs. As a sample: last fall he took the first premium on aged and also on young bulls, on heifer calf, yearling heifers, three year olds and cows above four years old; also the gold and silver medals on herd and sweepstakes at the State Fair.

After so many years of experience and observation, Mr. Bill gives his verdict in the most unqualified terms. I quote from a late letter:

"I never bred any other cattle in my life save Devons.  
 " \* \* \* \* I have owned many other breeds,  
 " but have never yet found so good a breed for butter and  
 " milk combined as the Devon. Take the cost of keep-  
 " ing into account, and in my opinion, they outdo any

“other breed of stock. Their calves come matched up  
“for steers and for practical purposes of the farm, they  
“are the breed for the farmer. Were I to worship any-  
“thing of the brute creation, it would be my fancy  
“Devon pets.”

---

ELAM C. BLISS was a native of Skaneateles, N. Y., and was born Nov. 13, 1802. He began life as a farmer at Westfield, N. Y., about the year 1819, and remained at the same place until his death, which occurred May 6, 1882.

Mr. Bliss began to breed Devons in the year 1853, making his first purchase from J. W. Collins, Sodus, N. Y., from whom he obtained the bull Bonaparte 327, and from L. F. Allen, Black Rock, N. Y., who sold him the Cow Rosa 2377. The bull traces to Fancy 134, one of the Patterson importation of 1817; the cow to the Rufus King importation of 1819.

In 1855 he purchased Blooming Beauty 702, of B. H. Andrews, Waterbury, Ct. These were the foundation of Mr. Bliss' fine herd.

Mr. Bliss seems to have bred with a view to *butter* and had marked success, his full grown cows yielding him an average of 300 lbs. per annum. He writes that his cow “Helena 32d 1438, has a record of 19 lbs. in seven days on *grass alone*.”

After an experience with Durhams, Herefords and Jerseys, Mr. Bliss gave his verdict in favor of the Devons in a letter to me written not long before his death as follows: “All things considered I prefer the *Devons*; they will keep fat on less feed and at the same time make as much butter as any breed of cattle I ever experimented with.” He also says that they will make more beef to the amount of feed and care than any other breed.

Mr. Bliss was recognized as a model farmer and stock raiser and his extensive practice and observation not less than his well known integrity render his opinion as to the respective merits of the breeds, of no small value to men engaged in kindred pursuits. His herd is now in the possession of his grandsons, the Rumsey Brothers, of Westfield, N. Y.

---

IRA H. BUTTERFIELD, SR., was born Dec. 6, 1812, in Gainesville, Wyoming county, N. Y. In 1838 he emigrated to Michigau, then a part of the extreme North West, and settled near Utica, Macomb county.

Mr. Butterfield became a Devon breeder in 1859. He purchased his first stock from L. F. Allen, of Black Rock, N. Y. They consisted of nine cows, one bull and five calves. Among the cows were Ariadne 4th 479, Fairy 1123, Sappho 8th 2503, Sappho 9th 2504 and Sappho 13th 2506.

The bull was Tempest 1168. Such was the basis of Mr. B's herd, descendants of which may be found in all parts of our country, and they are justly regarded as among the best. Mr. Butterfield continued in the business until the year 1864, when his son I. H. Butterfield, Jr., took control of the herd and managed it until about the year 1870; meanwhile several animals of note were bred, bought and sold by these parties, and although they do not seem to have bred with a view to milk and butter, yet their Sapphos and Fairy 1260 were notable milkers and butter yielders.

Mr. Butterfield died May 10, 1884, at Lapeer, Mich. From a notice of his death printed in the Michigan Farmer, I clip the following: "Mr. B. was an active member of the State Agricultural Society from its organiza-

tion, and was twice elected a member of the Executive Committee. In the awards of premium for several years his name frequently appears. He was a member of the State Senate at the time of the reorganization of the Agricultural College in 1861, and Chairman of the Committee on Agriculture and lent his aid to its fullest extent, for the benefit of that institution. He was one of the organizers and active officers of the Macomb County Agricultural Society, during his residence in that county."

---

J. W. COLLINS. This gentleman was born Nov. 12, 1807, in Smyrna, Chenango county, N. Y. He began breeding thoroughbred Devons in 1851 at Smyrna. In 1853 he removed to Sodus, in the same State.

The cows he began with were Victoria 2653 (of the Hurlbut stock), Caroline 764 and Roselle 2452, all tracing to Fancy 134, imported by Patterson in 1817. Victoria and Caroline, with their calves Jenny and Leo, both by Harry 654, were bought of J. K. Miner, of Guilford, N. Y. Roselle was bought of Seth Johnson, also of Guilford.

I am unable to obtain any information as to milk tests made by Mr. Collins. His son writes me, however, that Mr. C. considered the Devon a very superior milk and butter cow.

It is also impossible to give any facts as to prizes awarded at fairs and shows, during his career as a breeder. Mr. Collins died at Belvidere, Ill., Aug. 29, 1869.

---

L. G. COLLINS was born in Otsego county, New York, in 1813. He first became connected with the cattle breeding business in 1837, when he took charge as man-

ager of L. F. Allen's herd which then consisted of Durhams, Alderneys and Ayrshires as well as Devons. He continued in the employ of Mr. Allen until 1838, when he began to handle Devons on his own account, making his first purchase from Mr. Allen his late employer, of whom he obtained Duchess 1031. This cow was bred by James G. King, of Jamaica, Long Island, N. Y., sired by the celebrated Holkham 89, dam Duchess 112, imported by Hon. Rufus King in 1819. Out of Duchess 1031 Mr. C. obtained Duchess 1032 and Daisy 928 both by Anchises 7.

Mr. Collins writes: "In 1841 I bought two Devon cows that had been imported by Francis Rotch about the year 1838, I think, for which I paid \$500 (for the two). These were Herd Book animals, but at that time pedigrees were not so much looked after." \*

In 1846 Mr. C. removed to Dutchess county, N. Y., taking his Devons with him to his new home.

In 1849 he purchased from S. & L. Hurlbut, a cow and a bull out of Patterson stock; the names of these two animals are unfortunately lost. These may be considered the foundation of Mr. Collins' herd of Devons. The more important additions, made by purchase, for which only we have room, were the cow Fancy 1189 from H. N. Washbon, and bulls Herod 87 and Priam 138, from George Patterson.

In the fall of 1850, Mr. C. removed to Clinton county, Ohio, stopping on his way at Albany, where the New York State Fair was being held. He exhibited some of

---

\* I regret to say that I have been unable to obtain any further information concerning these two cows. In my "History of Devon Cattle in America," Vol. I. American Devon Record, page XLV., I give all the facts I have been able to glean, in reference to Mr. Rotch's importation. EDITOR,

his Devons at this fair and was awarded first prizes on his bull called "Eclipse" and cow Fancy 1189. He was a prize winner on Devons the same fall at the Ohio State Fair at Cincinnati and in 1851 at Columbus. From that date for several years Mr. C. was an exhibitor at National, State and County exhibitions and had a series of brilliant successes, the particulars of which we must omit for lack of room. Mr. B. became a resident of Montgomery county, Ind., in 1854, where he lived and carried on the business of cattle breeding until about 1866, when he removed to Lewis county, Missouri, settling near Gilead. He continued to reside in that part of the State until about 1882, when he removed to his present home at Bonne Terre, from which place he writes me that he has "the management of about 100 head of cattle, 500 sheep, 60 hogs &c."

As a result of his large experience in handling cattle, Mr. Collins gives the following opinions as to the merits of the Devons: "After trying nearly all kinds of cattle, I can say that in my opinion the Devons are as good cattle for general purposes as there is, taking feed into consideration. \* \* \* I have one cow (Luckey 3784) that has produced  $2\frac{1}{2}$  lbs. of butter per day *for weeks*, and I have frequently had others that have made from  $2\frac{1}{4}$  to  $2\frac{1}{2}$  lbs. per day."

---

WILLIAM L. COWLES was born in Farmington, Conn., in 1787, and continued to reside in the same neighborhood during his long life.

Mr. Cowles began to breed Devons about the year 1847. His herd was founded on purchases made from Geo. Patterson, R. L. Colt, and the Hurlbuts, and is the source to which many fine Devons trace. I am unable

to give names and numbers of the first animals he used. Mr. Cowles was a frequent winner of prizes at the fairs and cattle shows.

Failing health compelled him to relinquish the business in the year 1856, when his entire herd was sold at auction.

He regarded the Devons as more valuable not only for milking qualities but for draft cattle and beef, than any of the other breeds. Mr. Cowles died in the year 1868, at the advanced age of 81. The writer regrets his inability to give a more extended sketch of this well-known Devon breeder.

---

HARVEY DODGE. This eminent Devon breeder was born in Sutton, Mass., March 22, 1807. In a very interesting letter Mr. D. jokingly proves that he is himself a thoroughbred (Yankee) by reference to the fact that he is of the fourth generation on the female side and that his ancestor in the male line, was imported from England in 1645. The family has occupied the farm upon which he now resides during four generations.

Mr. Dodge has long been a leading spirit in the organization of Agricultural Societies, having been one of the originators of the United States, Massachusetts State and Worcester County Societies, as well as a promoter of the Agricultural College. He is also a member of a number of Town and local Agricultural Clubs. Mr. D. writes me (in 1882) that he has been a constant and successful exhibitor of Devons at Fairs and Cattle Shows during the last thirty-six years.

In 1845 the Massachusetts Society for the Promotion of Agriculture, sent a man to England to bring over some pure bred Devons. Among those imported by the

Society on this occasion, was the bull Bloomfield 20 and cows Cyprus 87 Honeymoon 172, Jasper 173 and Stella 348; all these cows were in calf to Derby 45 a bull sired by the celebrated English bull Hundred Guinea 91. The calf of Cyprus was dropped on board the vessel during the voyage and was named Chaos 41. All these were from the justly famed herd of the Earl of Leicester, for whom John Bloomfield acted as manager. The Society placed its imported animals in the care of Mr. Dodge and from them were descended the basis of his herd. He continued to breed Devons until a few months ago,\* when he sold the residue of his herd to Mr. L. E. Cox, of Grafton, Mass. He was compelled to sell out because his advanced age and infirmities forbade his giving the herd his personal attention. His interest in the breed, however, and his faith in their future are undiminished.

He writes: "If I was young again, I would go on with the same cattle, never breed a heifer until three years old, nor a bull until two, and never sell an imperfect animal but send it to the shambles, never sell to a poor keeper on any account. \* \* \* \*

If I had the blue grass of Kentucky, I would keep Devons for grazing, for they carry more *high-priced* meat to the shambles, take flesh faster, make as much butter and are more hardy for any section, than any other breed I know of."

---

ROLLIN GLEASON was born November 27, 1825, at Benson, Vt., where he still resides. He began his herd of Devons in September, 1858, when he purchased the cow Alma 436 from Mr. W. R. Sanford, of Orwell, Vt. Alma was by Blucher 318, dam imported Lily 199. Mr.

---

\* I write in May, 1884.—*Ed.*

G. afterwards obtained from Mr. Sanford, three heifers all descendants of Beauty 526, which celebrated cow is credited with having produced fourteen pounds of butter in seven days. Upon these three heifers Mr. Gleason founded his fine herd. He writes that from these cows he "raised several very fine animals and noted prize winners; among them, Beauty 3d G. 574 which took a first premium at the Vermont State Fair. \* \* Beauty 4th G. 579, Beauty 5th G. 580 and Beauty 6th G. 2978, all descended from Beauty 572, were also first prize winners, and, with others, was awarded a *herd* first prize."

One of the bulls used by Mr. G. in the early part of his career as a breeder, was Meriden 861, (by Comet 34, dam Fairy 131 imported.)

Mr. Gleason has on several occasions been a prize winner on bulls, some of which were bred by him and others obtained by purchase from the herds of Hon. E. H. Hyde and W. R. Sanford.

We are without information as to butter tests made by Mr. G.; but we are assured that after many years of experience in handling Devons, he holds them in high regard and has an abiding faith in their future.

---

STANLEY GRISWOLD was born at Torrington, Ct., (where he still resides) March 4, 1817. His grandfather was among the original settlers in that neighborhood, having made it his home in the year 1754, when he built a house on the farm now occupied by his grandson, the subject of this sketch.

Mr. G. writes me that when he was a child, his father "bred some Devons from Holkham 686, the first Devon bull brought into New England."

Mr. Griswold made his first purchase of recorded stock

in 1850, when he obtained the cow Rose 2405 of F. W. Cowles, Farmington, Ct. This cow descended from S. & L. Hurlbut's Fancy 1181. He bred this cow to Albert 6 (a bull imported by the Hurlbuts), also to Tuttle 1192, Albert Jr., 242, Robin 1055, and all Hurlbut bulis. The last named bull (Robin 1055) Mr. G. purchased of the Messrs. Hurlbut in 1854. In the years 1855, 1856 and 1857, Mr. Griswold took the first prizes at the Connecticut State Fair on this bull, also premiums at a number of local fairs during the same years. In 1851 he bought of John Boyd, of Winsted, Ct., the cows Clara 845 and Lily 1811, both descended from the Patterson importation of 1817. These may be considered Mr. Griswold's start as a Devon breeder. In the 34 years that have elapsed since the foundation of his herd was laid, Mr. G. has bred, bought and sold a great many animals. He writes: "I usually keep about 40 head, I think the Devons the best for milk and butter of any that I have had. I have tested them with Durhams, Ayrshires and Jerseys, and find none that make as good butter and pay as well for their feed. They are hardy, keep easily, make the best of beef and for the yoke they are not excelled by any breed."

---

HARLEY M. HALL. This gentleman was born Aug. 1, 1818, at East Burke, Vt. His father, Sylvester Hall, whose wife was a sister to S. & L. Hurlbut, bred Devons at an early day making his original purchases from the Hurlbuts, of some of the descendants of the celebrated bull Holkham 686. These animals were the originals of the herd of Mr. Hall, the subject of our sketch.

Mr. Hall continued to breed Devons until his death, which occurred Oct. 6, 1878. He was a man highly respected in his neighborhood and State, and justly regard-

ed as a careful and very successful breeder. He took several first prizes at State Fairs, but during the last few years of his life he discontinued the exhibition of his stock, as he thought it discouraged others whose success as stock raisers had not been so marked.

How Mr. Hall was regarded by those who knew him personally is well shown by the following extract from a newspaper on the occasion of his death :

“In the death of Harley M. Hall, Burke loses one of her best and most prominent men. He was known by everybody in Caledonia county and quite extensively known as a breeder of fine horses and Devon cattle. He was a man of excellent judgment, correct in all his views of social and business life, with every impulse and prompting of his heart in the right direction.”

---

A. C. HOWARD. This well known farmer and stock raiser, was born May 21, 1811, near Black Rock Church, Baltimore county, Md. The family removed to Ohio in 1828, settling on the farm five miles east of Zanesville.

Mr. H. became interested in the breeding of fine wool sheep in 1843, and was for many years a noted breeder in that line.

In 1860 he began to breed Devons, purchasing in August of that year, the cows Eurette 1099, and Touleta 2617 and (in 1861,) Ophelia 2190 and Fleda 1266, all from Jas. Buckingham. His first bull was S. A. Douglass 1090, bred by E. & A. B. Battelle, Newport, Ohio.

Upon these Mr. Howard founded a herd the descendants of which are held in high esteem by Devon men in all parts of our country. Besides the one named, his most noted bulls were Marylander 841, (the sire of the prize cows Rena 2d 2362 and Rena 3d 2363,) Gold 625,

Honesty 696, Honor 697 and Jack 721; the last four named were bred by Mr. H. and all became famous as sires.

Among his cows, Touleta 2617 won so many prizes at County exhibitions that she became known as the *Fair* cow. Ophelia 2190 weighed 1480 lbs. and was very successful as a prize winner at State Fairs. Cherry 824, Rena 2d 2362, Rena 3d 2363, Rena 17th 3562 and Clifton Belle 3433 were prominent among the large number of prize cows bred and owned by Mr. Howard.

The descendants of these fine animals may be found in all parts of the Western States and Territories, and seem to maintain their high character wherever they go. Mr. Howard died February 28, 1877, at the homestead near Zanesville, where his widow and sons continue the business of breeding Devons.

---

LEMUEL HURLBUT, of the celebrated firm of S. & L. Hurlbut, so familiar to every Devon breeder, was born at Winchester, Ct., in 1796.

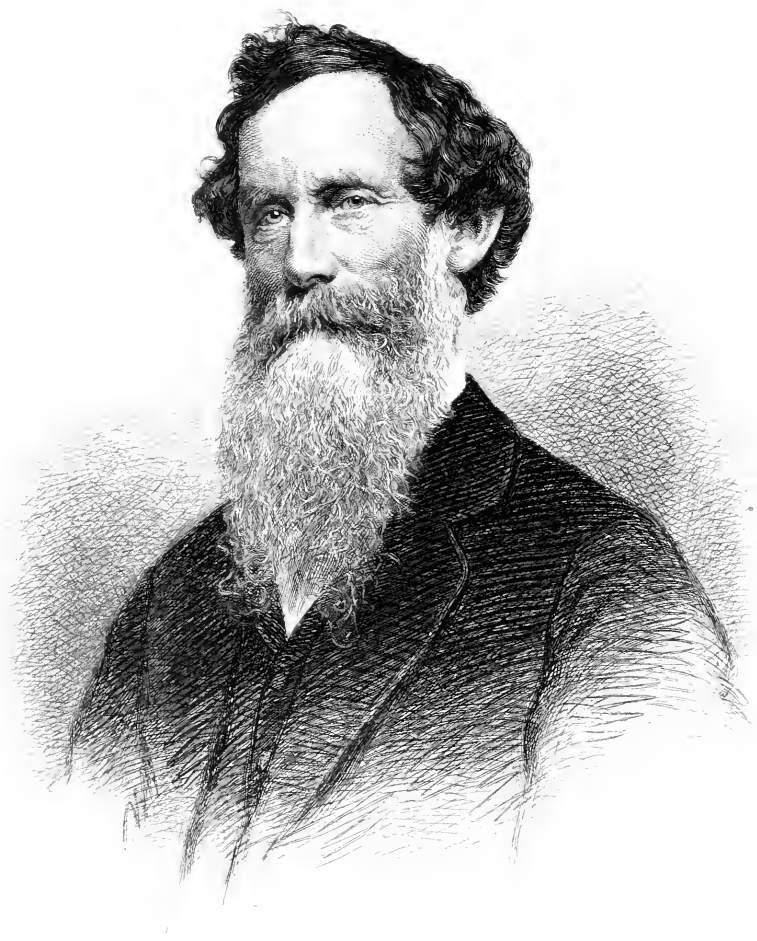

It ought to be stated that of the firm, Lemuel Hurlbut was the *Devon* man; his brother Samuel, the senior partner had no taste for cattle breeding, but as the brothers were partners in general business, so were they joint owners of the Devon herd.

The first purchase made by Mr. H. was from Richard Caton, of Baltimore, in the Fall of 1819, when he obtained the bull calf Holkham 686, (a name which figures in so many pedigrees) and the heifer Fancy 1179. These are claimed to be the first Devons calved in this country and probably are the earliest of which there exists any record.\* Mr. Hurlbut's son to whom I am indebted for

---

\* Mr. Samuel Hurlbut writes me that Holkham and Fancy were *certainly* the first Devons calved in this country, and that he had frequently heard his father and Mr. Caton speak of this fact.—*Ed.*

*Yours Very Truly  
Ephraim H. Hyde*

many of the facts noted in this sketch, writes: "From this bull Holkham and cow Fancy originated the Devon stock in Connecticut, my father being the first in the State, and for a long time the *only* breeder of Devons in the United States outside of Maryland. Messrs. S. & L. Hurlbut made but one importation—the bull Albert 6.

Mr. Hurlbut died in 1856. The following is extracted from *The Homestead*, an agricultural paper of that day:

"In the decease of Lemuel Hurlbut, agriculture in common with all other interests, has sustained a great and irreparable loss. For the last forty years he devoted his time and attention almost exclusively to the improvement of various kinds of stock and to the cultivation of the soil. His lands exhibit an increase of fertility rarely equalled in the country. \* \* \* In nothing, however, did his efforts meet with a better reward than in the importation and improvement of the North Devon breed of cattle. He was the first to introduce that celebrated breed into New England, and to his acute and far-seeing judgment the soil of America is largely indebted for the most beautiful cattle that ever stood upon it."

---

EPHRAIM H. HYDE was born in Stafford, Ct., in 1812. He remained on the farm until 1831, when he engaged in a mercantile trade.

In 1835 in addition to his mercantile pursuits, he invested in the foundry and blast furnace business and continued to be interested in these pursuits until 1842. In 1841 he was largely interested in the construction of the Hyde Co. Cotton Mill, an investment which proved unfortunate to him. In 1848 he engaged in woolen manufacturing, with a partner, and continued in that business until 1871.

In 1842 Mr. H. became a County Commissioner, serving as such two years. In 1851 and 1852 he represented his town in the General Assembly; while a member of that body he interested himself in forming a State Agricultural Society; he had it in operation in 1852 and was elected its presiding officer from 1858 until 1881. He led in a movement to organize a State Board of Agriculture in 1865, and had the satisfaction of seeing it fairly started by 1866 in which year he was chosen its Vice President and actual presiding officer, the Governor of the State being ex-officio President of the Board.

Mr. Hyde was elected in 1867 to the office of Lieutenant Governor of his State, and re-elected in 1868. In 1869 he declined another election. During his incumbency of the office of Lieutenant Governor, the position of United States Commissioner of Agriculture became vacant by the death of Mr. Newton. The friends of Mr. Hyde without solicitation on his part circulated at the State Capitol a petition to the President recommending his appointment to the vacant Commissionership. This petition was signed by every member of the Senate and House of Representatives as well as by ALL the State officers, *without regard to politics*—a singular honor and one the venerable gentleman might well be proud of. In 1876 he was a member of the State Senate from the 20th district. Mr. Hyde was one of the Presidential electors for Connecticut in 1852, when Franklin Pierce was elected. Since the year 1866 Mr. Hyde has been a member of the State Commission on Diseases of Domestic Animals, and during all that time has served as Chairman of the Board.

While engaged in these public duties Mr. H. did not neglect his farm. He writes: "When I took the Pleas-

ant Valley Farm it would then winter two head of cattle and one horse. In 1880 I had 80 head; much of the land will produce  $2\frac{1}{2}$  tons of hay to the acre." Mr. Hyde first became interested in Devons in 1832, making purchases from S. & L. Hurlbut of a bull and a heifer, the names and pedigrees of which are unfortunately lost.

In 1851 he purchased from Harvey Dodge, of Sutton, Mass., the cows Lady Jane 1739 and Lady Dodge 1717, also from Bela Tiffany, of Southbridge, Mass., the cow Fancy 1191. He writes: "I took all these to S. & L. Hurlbuts about 70 miles distant to be served by their bull. I *drove* them all there." This was in 1852. He got from Lady Jane 1739 the cow Beauty 536; of her he writes: "I have never owned a better cow in all the qualities: She is symmetrical, a first-class milker, a good breeder &c."

He also got Kossuth 771 out of Fancy 1191. He writes that from this bull he got the best milking stock he ever owned. In 1862 Mr. Hyde purchased from Randolph Linsley, of West Meriden, Ct., the imported cows Majestic 218, Jessie Davy 180, Fairy 131 and Empress Eugenie 127.

Space forbids further detail of Mr. Hyde's transactions in Devons; enough is given to give the readers an idea of the ground work of his splendid herd. Mr. H. is recognized as a judicious and careful breeder and one whose testimony as to the merits of the breed is of great value not only because of his large experience, but also by reason of his knowledged integrity. He concludes an interesting letter by saying "I like the Devon stock *best*; it is kept much easier than any other breed that I have handled, which includes Shorthorns, Jerseys and Ayrshires; some of them I had side by side with the Devons all these years till 1879."

C. H. JEWELL was born at Westville, N. Y., (where he still resides) Jan. 28, 1836. Mr. Jewell began to handle Devons in 1863, in which year he obtained of Truman Baker the bull Sir Walter 1127, tracing to the Patterson importation, also cows Edith 1038 and Fairy 1127. In 1865 he obtained the cow Curly 902, all these were of Patterson stock. These were the foundation of his herd.

Mr. Jewell is a frequent exhibitor at County and other local fairs, and has taken a great number of prizes for his Devons; he has had also several animals that have been awarded 1st and 2d prizes at *State Fairs*. Mr. J. writes me that he never made any milk tests of his Devons, but his experience has been that the breed are not excelled by any other in this respect.

Among those he considered his best specimens in all respects were cows Effy 1059, Edith 2d 1039 and her calf Edith 3d, by Sammy 1096, (she is not registered in the A. D. Record) and Fanny 1244. Mr. J. writes me that he has had excellent success in raising Devons for the yoke, several nicely matched pairs gaining him first prizes at various fairs. He says of the qualities of the breed in general:

“ They are the most hardy, easiest to keep and make a better quality of beef and more of it according to the amount of food consumed, make the best draft cattle, being easy to train and quicker of motion than any other breed.”

---

OWEN BROWN KING is by birth a Buckeye, having been born in Hudson, Summit county, Ohio, August 10, 1817. He became a Yankee by taking up his residence in Watertown, Ct., about the year 1850.

Mr. King became interested in Devons in the year 1866, when he purchased Adelaide 411 and Ruth 2490 from Gideon H. Hollister, of Litchfield, Ct. He also obtained the cow Sophia 2547 from the herd of John Allen, of Coldwater, Mich. In 1874 he purchased the bull Mattoon's Lion 849, and two cows from William Mattoon, of Springfield, Mass. These Mr. King sent to William B. Perkins, of Bryan, Ohio, to be kept and bred for him.

During the sixteen years from 1866 to 1882, Mr. K. handled quite a large number of Devons, making purchases from herds of known standing and selling to breeders in various parts of the country, a considerable number being sent to Ohio, and from thence westward.

Purchases were made by him from the herd of Mr. William Mattoon of the cows, Isabella 1530, Rose 7th 2412, Rose 10th 2414, Rose 12th 2416 and Rose 13th 2417. Selections from these with other animals owned by Mr. K. constituted the herd with which he carried away the bronze medal and a diploma at the Centennial Exhibition (Philadelphia, 1876.) Mr. King was a successful competitor at a great many fairs and cattle shows; among others the New England Exhibition and Rhode Island and Connecticut State Fairs, at each of which his well known bull, Mattoon's Lion 849 took first prizes. He was also awarded prizes for several of his cows at the same fairs, and he scored a number of similar successes at various local fairs.

Mr. King writes me the result of tests for butter, made with three of his cows, as follows:

"This cow (Beauty 589) is one of the three I have tested for butter. In 21 weeks she produced  $196\frac{3}{4}$  lbs. on grass, without grain; the butter was tested by good

judges and compared with Jersey butter as to quality, color &c., by the owner of a Jersey herd, (who was then getting 55 cents per lb. for all he made); he pronounced it to be superior in flavor and as rich in color as the Jersey. This test was made in the summer of 1877.

In 1878, I tested the cow Rose 2416 for 112 days (or 16 weeks). she produced 168 lbs. on grass alone. My cow Amanda 443 made 156 lbs. in the same length of time."

Mr. King sold his herd in January, 1882, his advanced age and failing health forbidding his further participancy in business. The purchaser was Mr. Chas. H. Huggins, of Gilson, Knox county, Ill., who is now building up a fine herd.

From the time he began breeding until he sold his cattle, Mr. H. raised and purchased between one hundred and two hundred head. From these have grown many valuable herds in different parts of the United States. Mr. King is justly regarded as one of the successful Devon breeders of our day.

---

PAYNE K. LEECH. This gentleman is a native of New York, being born in West Bloomfield, Ontario county, Jan. 31, 1809. He remained on the farm until 1830, when he emigrated to Michigan, where he was for some eight years engaged in the milling business. In 1838 he took possession of the farm at Utica, in Macomb county, where he still resides.

Mr. Leech made his first acquaintance with Devons in 1850, when he made use of the bull Prince Albert 970, to cross on native cows. He was so pleased with the result that in 1860, he began a herd of thoroughbreds, by purchasing Prince 962 and Sappho 13th 2506, both bred

by L. F. Allen, of Black Rock, N. Y. These two, Mr. Leech writes, were the foundation of his herd. From them he obtained Lily 1820, Luna 1901, Laura 1787, and others.

Mr. L. has competed for prizes at several fairs and taken a full share. He writes me that on two occasions at their State Fair he received as high as \$200 in premiums at each exhibition.

He never made any special test for butter, but was always satisfied with the product of his herd in that particular. He writes: "The few Devon breeders in this section have all done well and are with me, satisfied that the Devons are the easiest keepers, will stand hard fare as well as a native, and when well fed, give better results on the same amount of feed." Mr. L. concludes an interesting letter by saying that the breed is rapidly increasing in popularity in his neighborhood as well as in the entire State of Michigan.

---

JOSEPH B. LONGENECKER was born in Lebanon Co., Pa., in 1838. In 1861 he engaged in farming in Lancaster Co. In 1873 he moved to Union Deposit, Dauphin Co., where he now resides.

His first purchase of Devons were not recorded stock. Prior to the year 1869, he purchased of Levi G. Getz, of Lancaster, Pa., the bull Alexander 248 also the cows Daisy 947 and Jessie 1605 all descended from the Patterson importation of 1817. He afterwards procured the cow Lily 1823 bred by Geo. Patterson.

In 1869 he purchased of Daniel Steinmetz, Sheaneck, Pa., the cows Deerfield 2d 973 and Fairy 1132. In 1870 he made a public sale and disposed of all his *unregistered* Devons and a few recorded ones. He purchased the

same year from S. T. C. Brown (successor to Geo. Patterson) three heifers, viz: Minnie Price 2062, Nelly Price 2138 and Rose of Baltimore 2462. In 1872 he purchased the well-known imported bull The President 137 of S. T. C. Brown.

These may be considered the starters of Mr. L's herd. Mr. Longenecker writes me that his herd carried away the first prize at the Pennsylvania State Fair in 1875. In 1876 at the Centennial Exhibition, Mr. L's herd was again a winner, taking a medal and diploma. He also took first prize for best bull over three years old and sweepstakes for the best of any age at the State Fair in 1881, on his bull Cole's Puritan 3d 406. These are only a part of Mr. L's successes as an exhibitor of Devons.

No butter tests have been made by Mr. Longenecker, but from his observation of Devons in this regard, he considers them the equal of any breed. He writes: "The Devons *combine* more good qualities than any other breed and they are *second to none* in any valuable trait."

Mr. L's herd is now headed by the bull Modesty's Duke 2325, bred by Walter Farthing, Bridgewater, Somerset, England, and imported for Mr. Longenecker in April, 1882.

---

DR. J. CHESTON MORRIS was born May 28, 1831, in the city of Philadelphia, where he now resides. Dr. M. began to breed Devons in 1861. He writes: "A farm in Harford Co., Md., came into possession of my brother-in-law, Jesse Tyson, Esq., and myself, which we found stocked with Devons, bred by Lloyd Norris, (whose name is erroneously printed as *Morris* in Vol. I American Devon Record,) from stock purchased from George Patterson, Esq., crossed by a bull purchased from Capt.

Strandburg, of Easton, Md. Three years after this farm having been sold, I purchased at the sale three cows, one of them Beauty being quite old, the daughter of a Patterson cow by the Strandburg bull calf," (probably Beauty 551, by Billy Barlow 302.—Ed.)

Dr. M's next purchase seems to have been in 1865, when he obtained Maggie 1913, Nannie 2103 and Bes-sie 665, from George W. Hall, Belaire, Harford Co., Md. He also about this time purchased the bull Dick 459 from George Patterson. With these animals Dr. Morris began his herd at Fernbank, near Westchester, Pa., where they and their descendants, with an infusion of new blood as occasion required, have been and are still being successfully managed.

Dr. M. has exhibited Devons at various County Fairs in his own State, at the Maryland show, the Pennsylvania State Fair and the Centennial. In nearly all of these he has taken the first and second prizes, and at the Centennial he took a first premium with special mention for their milk qualities.

As to butter tests the Doctor writes: "For some fifteen years I made butter, and my yearly average varied from 170 to 175 lbs. per cow, taking the whole number of pounds made and adding to it that obtained by dividing the number of quarts of milk used for other purposes, (family supplies &c.) by 14 as given by Flint on milch cows, and dividing the amount (so obtained) by the number of cows in the herd, counting a heifer with her first calf as half a cow."

I will conclude this sketch by some further quotations from a very interesting letter written by Dr. Morris: "As compared with other stock the Devons in our section require less care, are more hardy and thrive on less food than any other breed; though with

them as with others, good feeding, not pampering, pays.

\* \* \* As milkers, when the *quality* of the milk is considered they are second to none. For several years I have been in the habit of placing at the Agricultural shows, side by side in a box with ice, jars filled with milk obtained from the cows of the different breeds on exhibition, such as Jersey, Guernsey, Ayrshire and Durham. The cream line stood nearly equal in the two first named (Jersey and Guernsey) with the Devon, perhaps sometimes  $\frac{1}{8}$  of an inch more, but was *much less* in the latter (Ayrshire and Durham. The *skim milk* was poorest in the Jersey and successively richer in the rest, (Guernsey, Ayrshire, Durham, Devon) but could not compare in any with the whiteness of the Devon, while the taste readily showed the greater richness of the latter in sugar. \* \* \* I think that the greater richness of the Devon milk causes it to part with its cream more slowly and hence has arisen the erroneous impression that they are not good butter cows."

Dr. M. has established a second farm near Lenni, Delaware Co., Pa., to supply the demand for pure Devon milk in glass jars. This milk is put up for the Doctor's Philadelphia customers, and the large amount sold shows that the good people of the Quaker City appreciate a superior article.

---

WARD PARKER was born in Windham, N. H., Oct. 18, 1819. His first venture in Devons was to purchase an unrecorded bull from Dexter Greenwood, of Hollis, N. H. In 1865 he bought of the same party, the cow Jessie 1607, and afterwards Rose 2d 2397. In 1869 he purchased of E. H. Hyde the bull Forester 567, together with cows, Nelly Bly 5th 2131, Venus 2644 and Gem 4th C. 1346.

These constituted Mr. Parker's start as a Devon breeder. He continued to add desirable animals from time to time, and meanwhile made frequent sales to parties in his own and neighboring States, finding a ready market for all he could spare. Mr. Parker's Devons carried away many first prizes at the New England and New Hampshire State exhibitions, also at a number of County and other local fairs, but we have not space to give the particulars of these contests, further than to say that Mr. P. was awarded the first prize for his herd at six State exhibitions. As to butter Mr. Parker writes: "My cows average something over 200 lbs. of butter a year for each cow, beside furnishing all the milk and cream used by my family of not less than four persons. \*

\* \* In the year 1872 the cash income from my five Devon cows was \$780." \* \* \* Jessie 1607 dropped her calf Jan. 18, 1874; in the month of February following, I made from her  $12\frac{1}{2}$  lbs. of butter per week. \* \* \* She was fed on dry hay and two quarts of meal per day. \* \* \* In October, 1873 I tested the milk of all my Devons with the lactometer, with the following results: Jessie 1607, 25 per ct. cream. Nelly Bly 5th 2131, 25 per ct. Rose 2d 2397, 24 per ct. Gem 4th C. 1346, 24 per ct. Venus 2644, 27 per ct. \* \* \* I have not found any other breed of cows that will make as much butter for the same keeping as the Devons."

---

B. F. PECK was born at East Bethany, Genesee Co., N. Y., in the house he now occupies, July 16, 1829. I cannot better begin this sketch than by quoting from an interesting letter from Mr. Peck; he says: "From my earliest recollection, my father was a breeder of cattle, and at a very early day in the settlement of the Holland

purchase, he improved his stock by an admixture of the blood of a Short Horn bull sent by the Holland Company to improve the stock of the settlers. \* \*

Later I bred from a Kentucky bull, and we had as a result a very good herd of grade Short Horns, many of the cows being good milkers and fine beef cattle."

Mr. Peck made his first purchase of Devons about the year 1871, when he obtained from B. N. Pierce, of Warsaw, N. Y., the old cow, Harmony 1400. He writes: "When she was put into a dairy of 16 cows, which included 7 or 8 of my Short Horn grades she proved the best milker in the herd, though I thought I had many choice ones. \* \* \* The next winter we observed that though she seemed a small eater, yet she was in the best flesh of any of the cows." This experience seems to have led Mr. P into breeding thoroughbred Devons. In 1873 he purchased of Walter Cole the bull Nemophilla's Huron 900, Helena 31st, 1437, and later in the same year he obtained from Mr. Cole, Candy Girl 756, Twilight 3d 2632, Twilight 4th 2633, Victoria 2d 2669, Victoria 3d 2671, Daisy 4th 938 and Butterfield's Helena 3d 748.

Mr. Peck was a frequent winner of first prizes at State and local fairs, but we lack space for even a partial list of his successes in these competitions. As to milk product Mr. Peck writes: "I have made no point of milk until the present time [this letter was written in 1882], but have bred exclusively for perfection of form and constitutional vigor. I have now put in a creamery and have met with very gratifying success thus far."

Of the general excellence of the breed he writes: — "We have constantly kept our Devons side by side with other cattle and have *invariably* found them the easiest

keepers, being quiet in pasture, never breaking down or jumping fences, and always in better flesh than the others, and when in stables during the winter, consuming less food. \* \* \* \* \* Ten years of breeding has more and more confirmed me in the opinion that for the general farmer, and especially on rough and hilly lands, no cattle are so well adapted as the Devons. For working oxen the steers are unequaled being very intelligent and docile and wonderfully muscular and courageous. I have used many ox teams of grade Short Horns but never found any that would at all compare in usefulness with the Devons.’

---

LUTHER RAWSON was born June 8, 1816, in Buckland, Franklin Co., Mass. He removed to Oak Creek, Wis., where he began to handle Devons eligible to registry about 1865, in which year he purchased of Mr. Mr. Bradley, of Milwaukee, the cows Amber 2d 447 and Corinne 2d 875. He obtained his first bull Carter 371, of George Baker, of Hustisford, Wis. Upon these as a basis, Mr. R. began his herd of Devons. He has been a successful breeder and although unable to give me much data upon which to base a sketch, he writes in a tone which shows that he is well satisfied with the results attained. Mr. Rawson has had flattering success as an exhibitor of Devons at various fairs and cattle shows, and writes me that his cash premiums averaged him \$200 per annum for the ten years ending in 1882. He has not made dairy products a point in breeding; notwithstanding this fact, he writes that he has raised some extra milkers and that his experience goes to prove that Devons give as rich milk as any other breed. He concludes a very brief letter thus: “I think that Dev.

ons will do better in our northern climate than any other breed; they will thrive where others would almost starve, and for beef they are far in the lead."

---

Besides the older breeders whose sketches we have room for, we have material for notices of several prominent Devon men whose lives and experiences it will be impossible for us to print in the present Vol. The experiences and testimony of these are no less interesting than those of the fathers of Devon breeding in America, and we regret that our space is so limited as that we are compelled to omit accounts of several who have more recently entered the field, but whose efforts are no less praiseworthy because they are of later date. Prominent among those I have been compelled to leave out is Mr. J. A. Pomeroy, of Sidney Center, Delaware Co., N. Y., who became interested in thoroughbred Devons in 1875, and who has since by careful attention to business reached a high place in the ranks. We have room for a line or two from a very interesting letter from Mr. P, [he writes in 1882], "I cannot begin to fill the orders I have for Devons, particularly for heifers. They are hardy, kind and gentle and very easy keepers. I am keeping between 60 and 70 head on a farm that twenty years ago would not support over 35 head of our common stock." As to butter making Mr. Pomeroy writes: after speaking of the popularity of other breeds in the dairies of his neighborhood; "But we make as much butter from a cow as the best of them do. We average 230 lbs. per annum to the cow in a dairy of 24 cows."

We will crowd in, also, a word of testimony from L. F. Ross, late of Avon, Ill., who has retired from the breeding business. He says; "I have made no milk

tests.       \*       \*       \*       Most of the cows will raise  
two calves and do it well.       \*       \*       \*       As to  
feed and care, I can raise three Devons on less feed and  
with less care than I can two Shorthorns; and the three  
will make more and better beef than the two Shorthorns,  
and being hardier than the Shorthorns, the losses in  
calving, by accident and want of care is much less.

## EXPLANATIONS:

---

In the arrangement of matter in this Volume, I have adhered to the plan of the two preceding Volumes; i. e. the bulls come first, beginning where Vol. II. left off; then the cows also beginning at the number next after the last one in Vol. II. These include all the entries made since Vol. II closed, both native and imported.

The figures preceding the names of animals refer to this work. Those which follow the names are explained by this illustration:

**1756** Eterne, 448, 324 H. (840) 49 C. 130 N. S.

EXPLANATION: 1756 is the animal's number in this work.

448 refers to the American Devon Herd Book (Sessions').

324 H. to Howard's Third Volume (the only one he ever issued).

(840) refers to the English Devon Herd Book.

49 C. to the Canadian Stock Register; and

130 N. S. to the Nova Scotia Stock Register.

The numbers of other works are used only in connection with the names of the animals in the headings of the pedigrees, except in cases of imported animals which have the English numbers given to the sires and dams;

these are indicated as above explained by being in parenthesis. With these few exceptions the numbers of sires and dams are those of this work exclusively.

The pedigrees in this Volume trace to Vol. II. and from thence to Vol. 1, in which they are followed back to importation or its equivalent.

An index alphabetically arranged as to names follows the pedigrees of cows and immediately after that index comes one giving name of each breeder with the name and number of each animal bred or at any time owned by him.

## Importations.

---

Since Volume II was published, the following importations of Devons have been made:

Cows: Mayflower 2d 5085, with her heifer calf, Miss Albion 5086, imported April, 1882, by B. F. Peck, East Bethany, N. Y.

Bulls: Champion 2324, also imported by Mr. Peck, April, 1882, together with Modesty's Duke 2325, the latter for J. B. Longenecker, Union Deposit, Pa.

# BULLS.

---

## 2237 AUGUSTUS.

Calved March 10, 1881. Bred by Chapman Bros., Wells Bridge, N. Y. Sold April 10, 1882, to L. F. Ross, Avon, Ill. By S. J. Tilden 1132, Dam Lizzy 4109, by Frank Chapman 574.

## 2238 GEORGE LEE.

Calved April 12, 1881. Bred by Chapman Bros., Wells Bridge, N. Y. Sold April 10, 1882, to L. F. Ross, Avon, Ill. By S. J. Tilden 1132, Dam Lucy Lee 1898, by Frank Chapman 574.

## 2239 REXFORD.

Calved July 6, 1881. Bred by Chapman Bros., Wells Bridge, N. Y. Sold April 10, 1882, to L. F. Ross, Avon, Ill. By S. J. Tilden 1132, Dam Blossom 2d 707, by Huron 2d 704.

## 2240 WATSON.

Calved May 20, 1880. Bred by J. C. Holmes, Earlville, N. Y. Sold April 8, 1882, to Truman Baker, of the same place. Sold April 10, 1882, to L. F. Ross, Avon, Ill. By Litchfield 2d 1766, Dam Curly 914, by Chango 390.

## 2241 RICHMOND.

Calved March 14, 1881. Bred by Cyrus R. Hoxie, Leonardsville, N. Y. Sold April 4, 1882, to Truman Baker, Earlville, N. Y. Sold April 10, 1882, to L. F. Ross, Avon, Ill. By Helena's Puritan 1626, Dam Ida 2d 2962, by Cole's Puritan 404.

**2242 TAM O' SHANTER.**

Calved May 21, 1881. Bred by Cyrus R. Hoxie, Leonardsville, N. Y. Sold April 4, 1882, to Truman Baker, Earlville, N. Y. Sold April 10, 1882, to L. F. Ross, Avon, Ill. By Helena's Puritan 1626, Dam Alida 4th 434, by Cole's Puritan 404.

**2243 VERNON LORD.**

Calved July 12, 1880. Bred by A. F. Bronson, Vernon, N. Y. Sold Sept. 26, 1881, to J. A. Pomeroy, Sidney Center, N. Y. By Brant 1344, Dam Lady Hartland 1735, by Litchfield 789.

**2244 DANDY DEVON.**

Calved April 10, 1882. Bred by J. A. Pomeroy, Sidney Center, N. Y. By Uncas 1196, Dam Silvy 2525, by Genesee 2d 616.

**2245 MONTAGUE.**

Calved April 12, 1882. Bred by J. A. Pomeroy, Sidney Center, N. Y. Sold Oct. 24, 1882, to J. H. Knapp, Mayfield, N. Y. By Uncas 1196, Dam Caroline 766, by Genesee 2d 616.

**2246 JUBAL EARLY.**

Calved March 16, 1882. Bred by C. E. Davis, Springville, Pa. By Gen. Grant 1918, Dam Indifferent 4373, by Reuben Davis 2232, 2d Dam One Horn Baltimore 4285 by Comet 420.

**2247 ROYAL PRINCE.**

Calved July 25, 1873. Bred by Solomon Boccock, Philo, Ill. By Prairie Farmer 957, Dam Cherry 807, by Prince of Wales 149.

**2248 BUCKEYE LAD.**

Calved July 3, 1881. Bred by D. J. Whitmore, Cass-town, Ohio. Sold April 27, 1882, to J. J. Skidmore, Camargo, Ill. By Elgin 531, Dam Lillith 3195, by Barefoot 272.

**2249 VIRGINIA PRINCE.**

*Bulls*—Braddock 2783.

## CORRECTIONS.

---

The following errors chiefly typographical and omissions have been discovered in Volume II, since its publication.

PAGE.

- 39, Bull Evans 1505, "sold in 185—, to ———," should read sold 185—, to O. H. P. Scott, Farmington, Iowa.
- 50, Bull Portage 1577, castrated March, 1879. (This was reported too late for Vol. II.
- 85, Bull Empire 6th 1817 Sold to H. Powell & Son, should read sold in 1865, to H. Powell & Son,
- 159, Cow Belle Flora 9th 2773. Sold Sept. 1, 1878, to John Miller, Richmond, Ind.; should read sold Sept. 1, 1878, to John M. Miller, Hickory, Pa.
- 393, Index, should contain the name of Beecher 1679.
- 395, Index, should contain the name of Evans 1505.

# TRANSFERS.

---

Transfers of Devons, entered in Volumes I and II, made since the publication of those volumes.
